

REMOTE BLOKE

How to Program a BOSS HT3 Garage Door Remote

We recommend reading all instructions first to ensure you have a clear understanding of the programming process.

1. Remove the motor faceplate to locate the **Radio Set button**. The button is generally yellow, but its colour may vary depending on the motor model.
2. Press and release the **Radio Set button** on the motor once. A light will illuminate on the motor.
3. Press and hold the button on the new remote that you wish to use to operate the door. Continue holding it until the light on the motor turns off.
4. Your remote is now programmed. Press the remote button to test its operation.

Programming complete. Keep these instructions for future reference.
